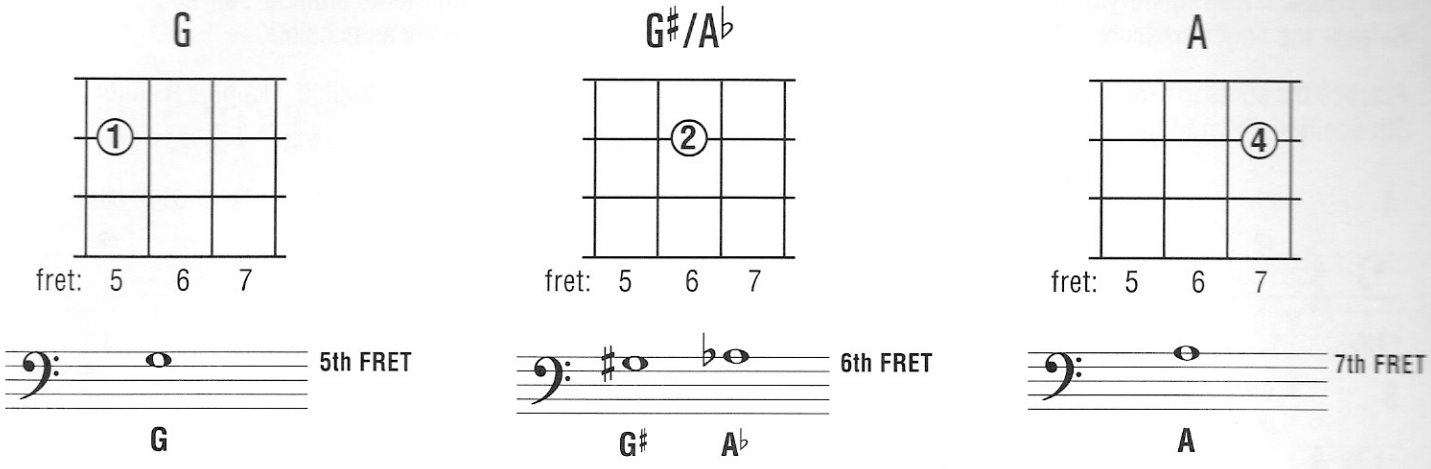
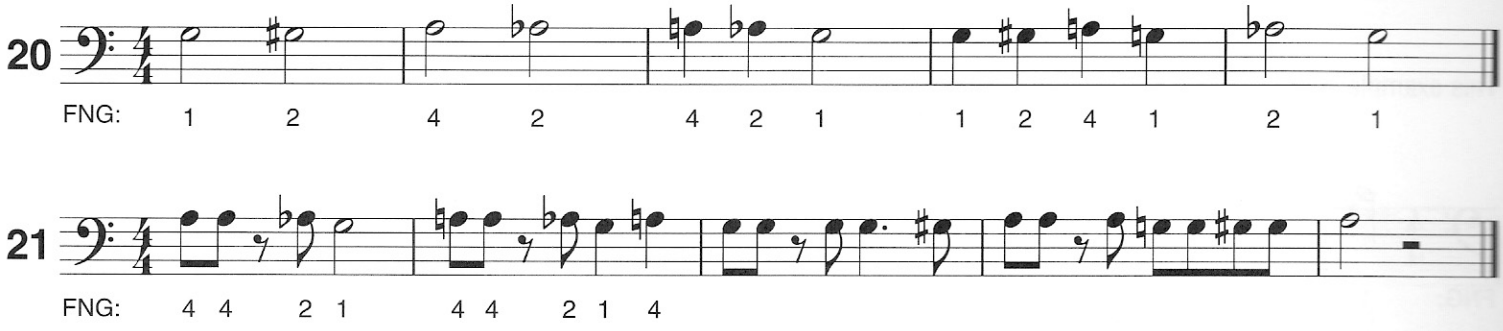
ON THE D STRING

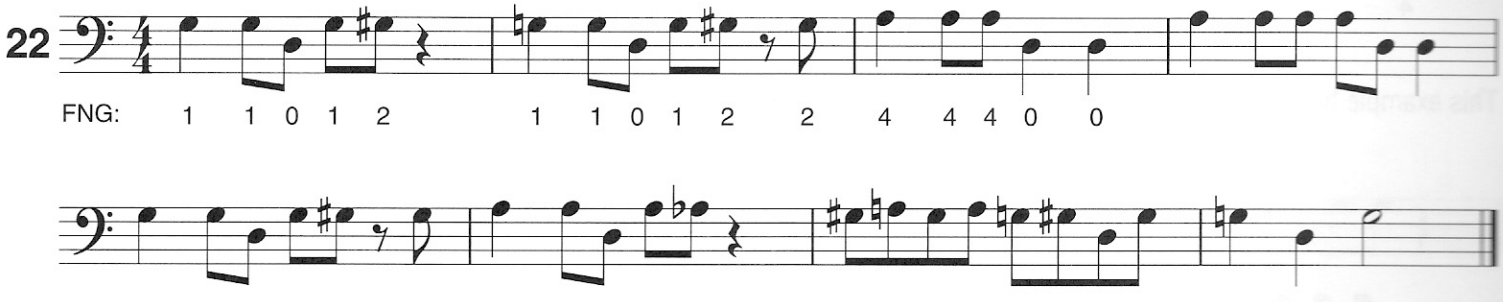
Here are the notes in 5th position on the D string.

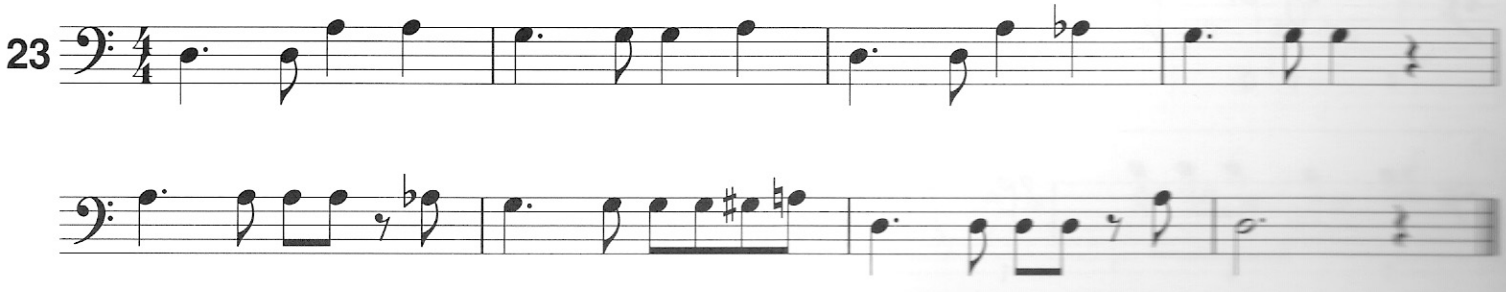


You'll recall these notes can also be found on the G string (open, 1st fret, and 2nd fret). Which position you choose to play them in will depend on the notes occurring before and after. For now, they'll be read in 5th position.



This example uses the open D string; stay in 5th position.



This example starts on open D, but it is still played in 5th position.


DEE GEE
